

*Presented by Laura Martinez, AT Specialist
Team of Advocates for Special Kids (TASK)*

AT and Transition

Technology can play a big role in successfully transitioning from high school to the adult world. We will introduce the different types of technology that may be useful in high school, college, in the workplace and to help foster independence. Attendees will leave with an understanding of what types of technology are out there to help older students and adults with special needs and where to obtain that technology.

Tuesday, May 21, 2013

9:00am to noon

**Location: Area Board XI
2000 E. Fourth Street, #115
